The SC Awards, now in its 27th year, recognize the solutions, organizations, and individuals that have demonstrated outstanding achievement in advancing the security of information systems. This year's awards were presented across 33 categories, celebrating both established industry leaders and emerging innovators.

F5 Distributed Cloud API Security stood out among a competitive field of entries, demonstrating innovation in addressing the evolving cybersecurity landscape. The Best API Security Solution award highlights F5's efforts to deliver practical, effective solutions that safeguard against today's complex threats.

"These award recipients represent the very best of what the cybersecurity community has to offer," said Tom Spring, Editorial Director at SC Media. "Each winner has shown a commitment to advancing the industry with forward-thinking solutions and an ability to adapt to new challenges. Their contributions help drive progress in securing our digital environments."

The SC Awards are presented by SC Media, a trusted cybersecurity resource, and evaluated by a panel of independent industry experts. Winners are selected based on their contributions to innovation, their ability to address the cybersecurity industry's critical challenges, and their demonstrated impact on protecting organizations.

"The 2024 SC Award serves as tremendous validation for the investments that F5 is making toward API security, and better serving our customers," said Derek Yee, Senior Director of Product Marketing at F5. "Not only being mentioned as a finalist, but then being selected as the winner is incredible. SC Media has a trusted place in the mindshare of security buyers, and helps parse the noise for them to understand who they need to pay attention to. Recognition like this really helps drive familiarity among our current and prospective customer base."
